

# YOERI VAN WASSENHOVE

JUNIOR WEB DEVELOPER

---

## OVERVIEW

HTML5 & CSS

JAVASCRIPT & PHP

REACT.JS

WORDPRESS

GIT

I am a purposeful junior web developer. I pivoted into this field from the service industry because I love computers and building things that people can use. Yet I acquired valuable leadership- and people- skills from my former industry.

In the years since, I have developed and maintained multiple websites from concept to deployment. I am able to work both in a team and independently. I believe I have the knowledge and practical experience to hit the ground running in this position.

### Summary of skills and abilities:

I understand how to measure and manage project scope both within a team and independently

I practice meaningful communication and have experience in delivering a professional service with care

I take responsibility for my own professional development because of an interest in my field

I wrestle with complexity

I know how to balance business objectives with client needs
